

## Tsz Ting, Chung

### EDUCATION The Hong Kong University of Science and Technology

Doctor of Philosophy in Computer Science and Engineering 2021 - Present

### The Chinese University of Hong Kong

Bachelor of Science (Hons) in Computer Science [1st Hons, ELITE Stream] 2017 - 2021

### WORKING Hunyuan Team, Tencent

EXPERIENCE Research Intern June 2025 - now

### Pattern Recognition Center, WeChat AI, Tencent

Research Intern May 2025 - May 2026

### Tencent AI Lab

Research Intern Nov 2023 - Sept 2024

### AWARDS & SCHOLARSHIP

2021-2026 Hong Kong Ph.D. Fellowship, Hong Kong Research Grants Council]

2024-2025 Outstanding PG Teaching Assistant Honorable Mention, HKUST

2021-2022 Professor Samuel Chanson Best PGTA Award, HKUST

2021-2022 RedBird Ph.D. Scholarship, HKUST

### RESEARCH InsightEmb: Learning Action-Intent Embeddings for Agentic Insight Retrieval

Tsz Ting Chung, Jiangnan Li, Jie Zhou, Dit-Yan Yeung\*, Mo Yu\* - *In Submission*.

- (Agentic Retrieval) To address the bottleneck of agentic insight/skills retrieval in geometry space, we introduce a new embedding model that generalizes across reasoning and agentic domains.

### PRELUDE: A Benchmark Designed to Require Global Comprehension and Reasoning over Long Contexts

Mo Yu\*, Tsz Ting Chung\*, Chulun Zhou\*, Tong Li\*, Rui Lu\*, Jiangnan Li\*, Liyan Xu\*, Haoshu Lu, Ning Zhang, Jing Li, Jie Zhou - *In Submission*.

- (Measure of AGI) Introduce a long-context benchmark requiring global comprehension and deep reasoning. Experiments show ICL, RAG, SFT, and DeepResearch systems fall behind humans and even more in reasoning.

### Many-Shot CoT-ICL: Making In-Context Learning Truly Learn

Tsz Ting Chung, Lemao Liu, Mo Yu, Dit-Yan Yeung - *ICML 2026*.

- (Many-shot CoT-ICL) It scales unreliably, similarity retrieval fails, and order effects grow with more demos. We reframe CoT-ICL as in-context test-time learning with 2 principles and propose CDS to improve reasoning.

### DivLogicEval: A Framework for Benchmarking Logical Reasoning Evaluation in Large Language Models

Tsz Ting Chung, Lemao Liu, Mo Yu, Dit-Yan Yeung - *EMNLP 2025*.

- (Logic Evaluation) Introduce a new benchmark to assess LLMs' logical reasoning while minimizing external influences, address data distribution bias, and propose a metric to reduce evaluation bias and uncertainty.

### Unified Triplet-Level Granularity Hallucination Evaluation for Vision Language Models

Junjie Wu\*, Tsz Ting Chung\*, Kai Chen\*, Dit-Yan Yeung - *TMLR 2025*.

- (LVLM Hallucination) Introduce a new framework to evaluate LVLMs' hallucination on the triplet level, with a benchmark dataset for evaluation and a mitigation method proposed based on the paper's findings.

### The Stochastic Parrot on LLMs Shoulder: A Summative Assessment of Physical Concept Understanding

Mo Yu\*, Lemao Liu\*, Junjie Wu\*, Tsz Ting Chung\*, Shunchi Zhang\*, Jiangnan Li, Dit-Yan Yeung, Jie Zhou - *NAACL 2025 (Oral)*.

- (Measure of AGI) Investigate the stochastic parrot phenomenon and propose a task that alleviates the memorization issue via the usage of grid-format inputs that abstractly describe physical phenomena.

### Selection-p: Self-Supervised Task-Agnostic Prompt Compression for Faithfulness and Transferability

Tsz Ting Chung, Leyang Cui, Lemao Liu, Xinting Huang, Shuming Shi, Dit-Yan Yeung - *EMNLP 2024*.

- (Token Compression) With simple tuning and small additional parameters, LLMs can achieve a better or similar level of performance in natural language understanding tasks with compressed demonstrations.
